Required Experience to Qualify for CMMI Professional Certification:

- 3-5+ years of professional experience

- 3 years minimum* of view-specific work experience (e.g., product development, service delivery, or supplier management)

- 2 years minimum of process improvement experience (developing, assisting, or implementing process improvements)

* If candidate has not earned a higher education degree or global equivalent, then 5+ years of view-specific work experience is required instead of 3.

You may attach your resume or LinkedIn profile to demonstrate that you meet the experience requirements.
