ISACA
CMMI Performance Solutions

CMMI V3.0 Released 6 April 2023

Differences between CMMI V2.0 and V3.0

Updated to reflect the evolving business landscape with recommendations from CMMI end-users and Partners around organizational performance improvements.

What's New?

THE FOLLOWING NEW PRACTICE AREAS WERE ADDED:

- **DM** Data Management
- **WE** Workforce Empowerment
- **EVW** Enabling Virtual Work
- **DQ** Data Quality
- **ESAF** Enabling Safety
- **MST** Managing Security Threats and Vulnerabilities

EXPANDED TO INCLUDE EIGHT DOMAINS:

- Development
- Services
- People
- Security
- Safety
- Suppliers
- Data
- Virtual

New Capability Area — Managing Data which helps businesses evaluate the data-related work they need to do and develop a plan for completing it.

New CMMI Certification – the CMMI Practitioner.
- Develop a knowledge of all CMMI domains to assess, improve and sustain process capability in different organizational contexts.
- Establish yourself as a process and capability improvement champion within your organization.

All CMMI Courses and Exams have been updated to align with CMMI V3.0, including updated training materials.

What Has Changed?

Retirement of the Supplier Source Selection Practice Area but incorporates some of its content into **Supplier Agreement Management.**

The Practice Area Enabling Virtual Solution Delivery is now called **Enabling Virtual Work** to highlight flexible work teams.

The Supplier Management domain is now **Suppliers.**

Minor verbiage changes to some of the Practice Areas

No longer accepting CMMI V2.0 appraisals
