

Welcome Aboard Your CMMI Journey

How to Get Started

✓ Define Your Goals for CMMI Adoption

What are your improvement goals?

What parts of the organization or projects would you like to be evaluated?

Do you want to obtain a particular maturity rating to set yourself apart from the competition?

Are you hoping to implement only particular Practice Areas to help with specific pain points already identified?

Look to your CMMI Partner to help you determine the best path forward to meet your business objectives.

✓ Select a CMMI Partner

Ensure you choose ISACA certified individuals as they have all:

- Completed necessary training
- Have been evaluated & certified for their knowledge & skills
- Obtained all necessary qualifications to provide official CMMI services
- Abide by ISACA's code of professional conduct

Browse the [Partner Directory](#)

- Search service providers by services offered, country/region, state/province and language fluency

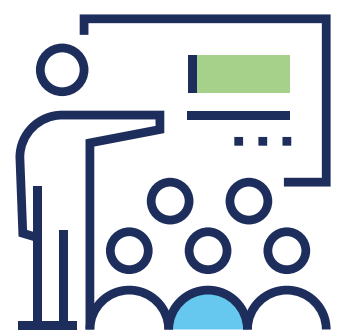

✓ Prepare Your Organization for CMMI Adoption

Train your team on CMMI best practices. We recommend taking the CMMI Building Organizational Capability course as your first step so your staff understands the value of the model and can continue to implement the best practices when your appraisal or consulting services are complete.

Purchase a [model viewer license](#) to begin exploring the best practices.

Download the [CMMI Adoption Guidance](#) document for more tips on how to get started with CMMI, or watch this [Tech Talk](#)!
